

Quick start ClickShare Conference

Plug in the Button

Plug the Button into the USB-C port of your laptop to connect to the room audio & video devices.

The Button LED will start blinking (*)

- **Windows computer:**
Windows will detect the ClickShare Button and the driver will be automatically installed
- **MacBook computer:**
Launch the ClickShare for Mac executable every time you plug a ClickShare Button into your USB port. The executable resides on the ClickShare Button (**)

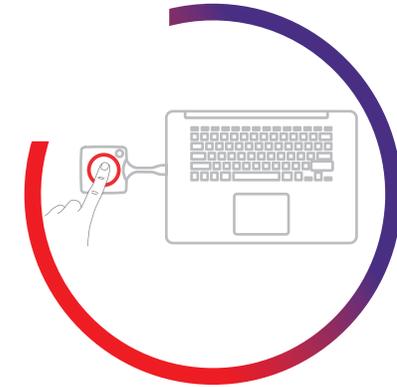

Join your call

Join your next video conferencing call on your Outlook calendar with one click. You are now wirelessly connected with the camera, microphone and speakers in the meeting room!

Find out more on:
How to use ClickShare Conference

- With MS Teams:
<https://youtu.be/TQFAL8twUZ8>
- With Zoom:
<https://youtu.be/Qe4VOmmTldY>
- With WebEx:
<https://youtu.be/1jmxle8KP6Y>

Push the Button

Push the Button so everyone in the room can see the remote meeting participants and start sharing content from your computer on the meeting room display and with remote attendees

Find out more on how to

- Use PowerPoint Presenter view with the ClickShare App
https://youtu.be/oP3hig_lvBs
- Use advanced sharing in the ClickShare App
<https://youtu.be/hdhVF1-6lnk>

(*) When the USB port is blocked, the Button LED ring does not start blinking when plugged into the laptop and no ClickShare drive appears in "My Computer" (Windows) or "Finder" (Mac).

(**) Enjoy a true plug & play by installing the ClickShare Launcher service on your MacBook. This is part of the ClickShare Extension Pack and can be downloaded here (<https://www.barco.com/en/support>)
