XK-1.3 MEDIA PLAYER

The Seneca XK-1.3 Media Player stands only 1.3 inches tall, but supports up to triple independent displays at 4K playback resolution. This ultra-thin form-factor device packs the performance of a full desktop, but can be easily mounted to a display, under a counter or even on a wall, making it ideal for quick-serve restaurants, kiosks, digital signage or retail applications. With the addition of an optional high-definition HDMI capture input, incorporate native video feeds into your digital signage campaigns and take dynamic control over what you show your audience.

Unlike other manufacturers who ship one-size-fits-all solutions, Seneca experts carefully plan and pair you with the right media player, scalable to meet specific needs. Each system comes equipped with Seneca's Maestro software, which loads and optimizes your CMS or analytics applications, saving hours of integration and setup time.

Designed and developed by Seneca's Advanced Engineering Team, the XK-1.3 was created in the world-class Seneca testing facilities designed by Intel®. From inception, Seneca systems are tested in real-world digital signage and edge environments to guarantee maximum reliability in mission-critical installations.

THE SENECA DIFFERENCE

maestro
Optimization realized

Standard with all Seneca media players, Maestro gets your optimized system up and running in minutes instead of hours. We channeled years of value engineering into an intuitive dashboard that eliminates hundreds of keystrokes. You don't even need an internet connection or data transfer from external drives.

KEY FEATURES

- Three times thinner than comparable media players
- Turnkey CMS integration
- HDCP passthrough
- Built-in optimization tools
