- Show every detail on a 55" diagonal screen with integrated dual stereo speakers.
- 2YD85A8#ABA

HP 8GB DDR4-2666 SODIMM

- Improve system performance and application responsiveness with low-power, high-speed DDR4 memory.
- 3TK88AT

HP TLC 256GB SATA SSD

- Expand the storage capabilities of your HP Elite Slice.
- P1N68AT

HP ODD Module

- Back up files and access content from your choice of optical media, quickly and easily.
- X8U73AA

HP Keyed Cable Lock 10mm

- Tether your device to a secure surface.
- T1A62AA

HP 5-Year Next Business Day Onsite Hardware Support

- High-quality remote assistance or convenient onsite support available the next business day.
- U7899E, UE334E

Microsoft Teams Rooms hardware and software

A center of room touch controller lets you manage a Microsoft Teams meeting end to end.

End-user benefits

- **Familiar user experience and ease of use**
  Center of Room Control (CoRC) with integrated auto sensors and one-touch join to quickly start a meeting. The CoRC shows the calendar for that room, as well as ad-hoc call or conference capabilities. This solution is built on the familiar Microsoft Teams and Skype for Business that employees are using at their desks. However, it goes beyond an end-user feature set to enable fully scalable conferencing features for users in the room or far afield.

- **Easy content sharing**
  HDMI ingest enables people who are not on your network to share content (many companies do not want their visitors accessing their network). Whiteboard sharing is enabled and aids in collaboration with Microsoft Teams Rooms.

- **Great audio and video experience**
  Microsoft Teams certified built-in audio or external audio peripherals aid in clarity. Participants can be clearly seen and heard with video enablement.

- **Flexible and extensible hardware and software feature set**
  The same basic user solution is capable of small group or huddle conference rooms. However, HP Elite Slice G2 with Microsoft Teams Rooms can scale up to large rooms with drop-down microphones, high-end camera controls, and more to ensure that your meeting experience is similar from room to room without an end user needing different steps to start and collaborate in meetings.

ITDM benefits

- Happy end users
- Familiar end-user interface means easier training, adoption, and provision
- Secure from the BIOS level with HP Sure Start—important for a standalone device
- Built on Windows 10 IoT, so it can be managed like a PC with all devices in one shared view (integrates with management tools such as Microsoft SCCM and analytics drawn from HP DaaS)
- Easy installation and secure cable and port management ensure cables will not "walk away"

Why HP and Microsoft Teams Rooms?

Microsoft Teams is a multilayered ecosystem built for collaboration, and it integrates well with HP Elite Slice G2. The solution enables workgroups to communicate effectively and work with confidence.

Certified for Skype for Business
- Tested for highest quality audio and video
- Supported by Microsoft and our partners
