

InteGreat Under Table Cable Management

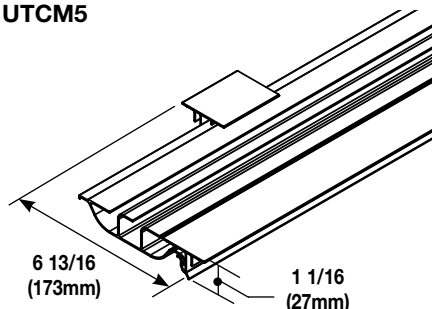

InteGreat Under Table Cable Management provides clean cable management for power, communication and A/V cables on the horizontal underside of the table. The simple hinge mechanism allows for easy access for future technology upgrades. InteGreat Under Table Cable Management mates with the InteGreat Transition Channel for a true cable management solution.

Manage cords and cables under the table with easy to order, easy to install, easy to maintain InteGreat Cable Management.

InteGreat Transition Channel

InteGreat Transition Channel continues the cable management and protection from the underside of the table to the floor, where cables can gain access to the building infrastructure. The Transition Channel fits directly into InteGreat Under Table Cable Management on the underside of the table and mates with Wiremold® Poke-Thru Devices or OFR Series Overfloor Raceway for a smooth transition to the building infrastructure.

InteGreat Transition Channel provides a protected pathway for cables to the building infrastructure. It is designed to work with Wiremold® Poke-Thru Devices and OFR Series Raceway.
