> - *Control your home or office from an array of smartphone and tablet devices*
> - *Adjust lights, media, climate, security and more*
> - *Mix and match mobile devices without reconfiguring the system*
> - *Add or upgrade devices without a service call*
> - *View live streaming cameras[5]*
> - *Link to multiple Crestron® control systems*
> - *Connect via Wi-Fi or any mobile data network*
> - *Paid and free versions available*

Take full control of your home, office or boardroom from any Apple® iOS or Android™ mobile device. The popular Crestron Mobile Pro® app[1] turns an iPhone®, iPod touch®, iPad®, Samsung™ Galaxy Tab, HTC EVO 4G™, HTC™ Droid™ Incredible, Motorola Droid X, or other mobile device[2] into a virtual Crestron touch screen. Using a wide variety of smartphone and tablet devices, Crestron Mobile Pro lets you control your home theater or whole-house AV systems, lighting, climate control, shades, security and other functions from virtually anywhere.

Crestron Mobile Pro is available for purchase and download through the iTunes® Store and Google Play™.

Open Platform
Crestron Mobile Pro is engineered for scalability and open-platform compatibility. A system configured to work with an Apple device also works with Android, so all your devices work the same and every member of the family enjoys the same quality user experience.

Flexible Configuration
Crestron Mobile Pro lets you add or replace phones, or switch mobile carriers whenever you want. Enjoy any combination of Android and Apple devices on the same Crestron system with no extra programming required[1,3]. Most new devices can be added to the control system without even requiring a service call from your installer[4].

Gestures Navigation
Swipe, flip and rotate — gestures navigation has become the natural way we communicate and search for data on our mobile devices. Native to Crestron Mobile Pro, gestures navigation lets you browse through control menus, media playlists or AV sources with a simple finger swipe. Need to go widescreen? Simply rotate the device and the screen reformats automatically. Whether in portrait or landscape mode, everything you need is just a touch away.

Customizable Graphics
Crestron mobile apps give developers a clean canvas on which to create stunning graphics and intuitive user interfaces. A truly customizable app, Crestron Mobile Pro allows GUIs from Crestron touch screens to be seamlessly transferred to mobile devices for consistent styling and functionality.

Global Connectivity
Supporting Wi-Fi and mobile broadband network connectivity, Crestron Mobile Pro keeps you connected wherever you are. Even away from home you can turn lights on or off, let the repairman in, or check the security system to see if the kids are home. While you're on your way home, why not warm up the hot tub for your evening getaway? Whatever you need to control, Crestron Mobile Pro lets you do it remotely as if you were there.

Streaming Video[5]
View live video streams right from Crestron Mobile Pro — the perfect way to keep an eye on your home while away, see who's at the front door, or catch a glimpse of the baby's room. Most popular IP cameras and video streamers including the Crestron CEN-NVS200 enable the viewing of live video within the Crestron Mobile Pro user interface letting you simultaneously see and control what's going on.[5]

Notes:

1. Crestron Mobile and Crestron Mobile Pro are optimized for the iPhone, iPod touch and Android devices. Crestron Mobile G and Crestron Mobile Pro G are optimized for the iPad.
2. The Crestron control app is designed to work with devices compatible with Apple iOS and Android. Crestron cannot guarantee compatibility with all 3rd party devices.
3. Some reformatting may be desired for different resolution devices.
4. Requires the IP address and ports to be keyed into the app setup screen.
5. Requires paid app (Crestron Mobile Pro or Crestron Mobile Pro G).
6. Check with device manufacturer for connectivity capabilities (may require a mobile data plan).
7. Price subject to change without notice.

This product requires a Crestron control system for full functionality, sold separately. This product may be purchased through the iTunes® store or Google Play™. Other Crestron products may be purchased from an authorized Crestron dealer. To find a dealer, please contact the Crestron sales representative for your area. A list of sales representatives is available online at www.crestron.com/salesreps or by calling 800-237-2041.
