- ✓ Somfy, all ceiling fans, and fireplaces
- ✓ 2.4GHz Wi-Fi, Ethernet + POE
- ✓ Extended warranty
- ✓ Drivers for C4, Elan, RTI, URC and more
- ✓ Live tech support

The Whole Story

The Pro Installer market has spoken, and we listened: Bond Bridge Pro is low frequency RF to Wi-Fi/ Ethernet bridge with a new look and new functionality with its great design.

It was created and designed for Pro Installers who demand to take the experience of using a Smart Bridge to the next level. It is an easier, faster, and more powerful way to connect RF controlled devices in a smart home automation portfolio.

The setup is quick and easy, and there is no need for workarounds or complicated drivers in order to connect ceiling fans, fireplaces or shades.

Just mount the Bond Bridge Pro to the wall or ceiling in a central location, to allow for full coverage and control of RF devices within the entire home. And, with PoE and ethernet, it allows a fully hard-wired integration.

And we are Open! Our open API allows integrations with all home automation systems.

Supported Devices

Ceiling fans

Motorized shades

Fireplaces
