FireNEXTM-uLINK-S

USB 3.0 SuperSpeed Active Repeater Cable Extends USB 3.0 for up to 30m

Data Sheet

Description

To break the 3 meter practical length barrier of USB 3.0 with assured reliability, FireNEX-uLINK-S™ series active repeater cable was developed to extend USB 3.0 signal up to 30 meters with custom options for lengths and connector configurations.

FireNEX™-uLINK-S provides a one-cable end to end extension solution for USB 3.0 5Gbps data transfer as well as being backward compatible with USB 2.0/1.1. With the extreme low power consumption, FireNEX™-uLINK-S can deliver ample power to the connected USB device and require no additional power input, which makes it act just like a simple USB cable, help customer to minimize the effort of USB extension.

FireNEX-uLINK-S $^{\text{TM}}$ was awarded a 2015 Vision System Design Innovation Prize and proven to be the highly reliable product over years.
